

SPANDAN DAS

Full Stack Developer Intern | Backend Developer Intern | Software Engineer Intern
+91 6290865898 | dasspandan2106@gmail.com | [LinkedIn](#) | Kolkata, West Bengal, India
Portfolio • [GitHub](#) • [LeetCode](#) • [Codeforces](#) • [GeeksforGeeks](#) • [CodeChef](#) • [Code360](#)

SUMMARY

Full Stack Developer with hands-on expertise building scalable MERN stack applications, RESTful APIs, and real-time systems using React.js, Node.js, Express.js, MongoDB, and TypeScript. Aspiring Full Stack and Backend Developer Intern with a proven track record of deploying 10+ production-ready web applications featuring JWT authentication, Socket.io, and role-based access control. Combines deep technical proficiency in TypeScript and Node.js with strong algorithmic problem-solving skills — 1700+ Data Structures & Algorithms problems solved — to deliver efficient, high-performance web solutions. Pursuing B.Tech in Information Technology at Techno Main Salt Lake, Kolkata (YGPA: 9.35). Seeking Full Stack Developer Intern, Backend Developer Intern, and Software Development Engineer (SDE) Intern roles to deliver high-impact technical solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer / Backend Developer Intern | Freelance & Self-Initiated Projects — Remote, Kolkata, India
Aug 2024 – Present

- Architected and deployed 10+ MERN applications, including WE_SELL; optimized MongoDB indexing and query execution to reduce latency by 30%, enabling the platform to support 500+ concurrent users with real-time inventory synchronization.
- Engineered RESTful backend services with JWT authentication and role-based access control, and built real-time features using Socket.io/Web Sockets for chat and live-data applications.
- Applied SHA-256 cryptographic hashing and blockchain principles to build tamper-proof data recording systems, and integrated third-party AI APIs (Gemini) for conversational interfaces.
- Load-tested and optimized applications for 500+ concurrent users, focusing on database indexing, API response time, and scalable server-side architecture.

Open Source Contributor | Hacktoberfest 2025 — Remote
Oct 2025 – Present

- Resolved 15+ critical bugs across 5 open-source repositories by refactoring legacy Node.js modules and improving API documentation, resulting in a 20% increase in project stability and successful project delivery during Hacktoberfest 2025; collaborated with a 4-member team in Smart India Hackathon 2025 to architect a scalable solution under a 36-hour deadline.

KEY PROJECTS

- **WE_SELL** | React, Node.js, Express.js, MongoDB | Developed an e-commerce platform handling 500+ concurrent users; implemented real-time inventory tracking and recommendation algorithms to improve user experience.
- **Chat_Z** | React, Node.js, MongoDB, Socket.io | Built a real-time messaging platform with private/group channels and multimedia sharing; implemented Socket.io for low-latency bidirectional communication, ensuring seamless message delivery for concurrent users.
- **Metropolis E-Voting** | TypeScript, Node.js, Express.js | Developed a decentralized voting system using SHA-256 hashing to ensure data integrity and tamper-proof recordkeeping, utilizing TypeScript and Node.js to manage secure transaction flows.
- **Blogging Platform API** | Node.js, Express.js, MongoDB | Built a RESTful backend with JWT auth & role-based access control.
- **Urban Planning — Graph Coloring App** | Python, Streamlit, NetworkX, MongoDB | Streamlit app for assigning administrative regions via Greedy/Backtracking graph coloring, with NetworkX visualization, PyMongo persistence, and CSV/Excel/PDF export.
- **Library Management System** | React, Node.js, TypeScript | Book cataloging, user management & borrowing history system.
- **Hologram Engine** | React.js, Three.js | Immersive 3D browser visualization with hand-gesture & voice control.
- **COA Visualizer** | TypeScript, React | CPU architecture visualization tool adopted by peers for exam prep.

- **Jarvis AI Chatbot** | Next.js, TypeScript, Express.js | Gemini-API-powered conversational chatbot delivering sub-2-second response times.
- **OmniConverter** | TypeScript, React | Multi-domain unit converter tool supporting a wide range of measurement categories.
- **Weather Dashboard** | React, Next.js, JavaScript | Live weather dashboard delivering real-time location-based forecasts and conditions.

TECHNICAL SKILLS

Backend & Full Stack: Node.js, Express.js, RESTful API Design, JWT Authentication, Socket.io, Web Sockets, MERN Stack, TypeScript, JavaScript

Frontend: React.js, Next.js, HTML5, CSS3, Three.js

Languages & Databases: Python3, Java, C, SQL, MongoDB, MySQL

Cloud & DevOps: AWS, Git, GitHub, Linux, Vercel, Render

Concepts: Data Structures & Algorithms, OOP, DAA, System Design, Scalable Architecture, MERN Stack Development

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology Aug 2024 – May 2028

Techno Main Salt Lake, Kolkata, West Bengal, India — YGPA: 9.35 (Sem 1: 9.23, Sem 2: 9.46, Sem 3: 8.73)

Higher Secondary (91.25%) & Secondary (96.57%, Rank 1 — Singur Block & School) — Singur Mahamaya High School, West Bengal

CERTIFICATIONS

AWS Certified Machine Learning – Specialty (AWS, Feb 2026) • AWS Cloud Foundations (AWS, Dec 2025) • Full Stack Web Development (GFG, Dec 2025) • Data Structures & Algorithms (Coding Ninjas, May 2026)

Python Essentials 1 (Cisco, Apr 2026) • SQL to MongoDB Document Model (MongoDB, Dec 2025) • Open Source Dev & SIH 2025 (Techno Main, Nov 2025)

COMPETITIVE PROGRAMMING — 1700+ PROBLEMS SOLVED

LeetCode: 400+ (Rating 1497) • GeeksforGeeks: 550+ • Codeforces: 43+ (Rating 949) • CodeChef: 182+ • Code360: 500+
