PROFESSIONAL EXPERIENCE

Full Stack Developer / Backend Developer Intern | Freelance & Self-Initiated Projects — Remote, Kolkata, India Aug 2024 – Present

- Architected and deployed 10+ full-stack MERN applications; engineered a high-concurrency e-commerce platform (WE_SELL) supporting 500+ concurrent users with real-time inventory management and personalized recommendations.
- Engineered RESTful backend services with JWT authentication and role-based access control, and built real-time features using Socket.io/Web Sockets for chat and live-data applications.
- Applied SHA-256 cryptographic hashing and blockchain principles to build tamper-proof data recording systems, and integrated third-party AI APIs (Gemini) for conversational interfaces.
- Load-tested and optimized applications for 500+ concurrent users, focusing on database indexing, API response time, and scalable server-side architecture.

Open Source Contributor | Hacktoberfest 2025 — Remote

Oct 2025 – Present

- Contributed to open-source JavaScript/TypeScript repositories during Hacktoberfest 2025 by resolving critical bugs and enhancing documentation; collaborated in the Smart India Hackathon 2025 to develop scalable technical solutions under time-constrained conditions.
